

Things to consider when having a party:

<p>Are you having a Grad party?</p>	<p>Plan to seat approx. 50% of your invited graduation guests at any one time, plus factor in your friends & family that will attend the event from start to finish. Note: High Top (Cocktail Tables) work great to satisfy those fast moving guests just grabbing a quick bite before moving on.</p>
<p>Are you preparing your own food or having it catered?</p>	<p>You may need:</p> <ul style="list-style-type: none"> • Tables for serving food • Ice Tables for salads or beverages • Food warmers/servers such as Electric Roasters or Chafing Dishes • Large Gas or Charcoal Grills
<p>Are you considering a canopy?</p>	<p>Consider the type of surface you intend to set a canopy on.</p> <ul style="list-style-type: none"> • Concrete & asphalt surfaces provide a clean & stable useable surface rain or shine but require the use of a weighted EZ UP Canopy or a Frame Style Canopies. • Rope & Pole (Tent Style) can <u>only</u> be set on a firm, level grassy turf surface, but do provide the best value of all style of canopies. SEE considerations below.
<p>Site selection considerations for a rope/pole canopy</p>	<p>The “turf” should be reasonably flat, and large enough to allow at least 6 feet of space around the perimeter of the canopy, (Ex: a 20’ x 20’ tent requires an area no less than 26’ x 26’ to allow for ropes and stakes). Make sure the area is free of underground utilities, overhead obstructions, and has emergency evacuation routes in case of fire or bad weather. PREPARE the area by mowing and bagging the lawn. *Canopies CANNOT be set up on driveways or hard surfaces. Note: Soft soil conditions may require additional stakes ** Call 811 before you dig</p>
<p>Should you use sidewalls on the canopy?</p>	<ul style="list-style-type: none"> • Frame-style canopy sidewalls are a solid vinyl and provide a great backdrop for serving food or protection from wind & rain. In warm weather, use them sparingly as they greatly increase the temperatures under the canopy to the point of being intolerable. • Rope/Pole style canopy sidewalls are white mesh, designed to help filter a breeze or provide some privacy. (Not recommended for use in windy, wet, or very hot temperatures.)
<p>Consider the possibility of rain and in climate weather</p>	<ul style="list-style-type: none"> • Always have a plan “B” if sustained wet weather leads up to your event. • Having a well groomed lawn helps in the event. • Saturated or loose soils make it nearly impossible to keep rope/pole canopies standing and makes for an unsafe environment for the use of tables & chairs.

<p>Where will your guests go to use a restroom?</p>	<ul style="list-style-type: none"> • Will you be allowing your guests to use the restroom in your home or do you want to bring in a clean easy access chemical toilet? • Consider a handicap accessible unit and a portable wash station
<p>Will your event run past sunset?</p>	<p>Consider safe navigation for your guests in and around the party area. Adding some Edison String Lighting is not only great for safe navigation, but also adds to your overall evening party atmosphere.</p>

We offer a wide variety of party goods, food service, table & chair, and canopy rentals. Let us help you make your next party a great one!

Rope & Pole Canopies

Frame Canopies

EZ Up Canopies

Food Service

- Punch Bowls
- Serving Bowls
- Chafing Dishes
